

system.db.exportCSV

This function is deprecated, use `system.dataset.exportCSV`.

Description

Exports the contents of a dataset as a CSV file, prompting the user to save the file to disk. This function works exactly the same as `system.dataset.exportCSV`.

Syntax

system.dataset.exportCSV(filename, showHeaders, dataset)

- Parameters

- `String` filename - A suggested filename to save as.

- `boolean` showHeaders - If true (1), the CSV file will include a header row.

- `Dataset` dataset - The dataset to export.

- Returns

- `String` - The path to the saved file, or None if the action was canceled by the user.

- Scope

- Client
