

system.tag.removeTags

This function is used in **Python Scripting**.

Description

Removes multiple tags from Ignition with a single call.

Client Permission Restrictions

Permission Type: Tag Editing

Client access to this scripting function is blocked to users that do not meet the role/zone requirements for the above permission type. This function is unaffected when run in the Gateway scope.

Syntax

system.tag.removeTags(tagPaths)

- Parameters

`String[]` tagPaths - An array of the paths to the tags you want to remove. Note: you can specify the tag provider name in square brackets at the beginning of the parentPath string. Example: "[myTagProvider]MyTagsFolder". If the tag provider name is left off then the project default provider will be used. Note that an empty path ([' ']) will remove all tags.

- Returns

nothing

- Scope

All

Code Examples

Code Snippet

```
system.tag.removeTags([ "Tag1", "Tag2" ])
```
