vector graphics Created Apr 12, 2017 (23:13)

Vector based graphics like SVG image files show images with no pixelation when the size is changed. This is because they have rules like 'draw a black square 20% of the image width', whereas raster image (png, jpg) say 'pixel 158 is colored black'.

Virtual Machine Created Mar 30, 2017 (21:54)

A Virtual Machine (VM) is a software program that allows a virtual Operating System to run on top of whatever OS is controlling the hardware. One major benefit of a VM is if it crashes, it can be quickly and easily started from a saved safe state. Multiple virtual machines can also exist within a single host at one time, and can be run cheaply from the cloud by services like Amazon's AWS.

visualization Created Apr 12, 2017 (23:05)

The system that allows you to see what your process or facility is doing. Process Visualization would be created in Ignition to view the current status of your process.

VNC Created Sep 28, 2016 (22:28)

Virtual Network Computing (VNC) is a graphical, desktop sharing system that uses the Remote Frame Buffer protocol (RFB) to remotely control another computer. VNC is platform-independent – there are clients and servers for Java and for many GUI-based operating systems. This form of desktop sharing transmits keyboard and mouse events from one system to another over the network based on screen updates.

VoIP Created Oct 30, 2018 (22:44)

Synonym(s): IP Telephony

Voice over IP (VoIP) is a method and a group of technologies for delivering voice communications and multimedia sessions over Internet Protocol (IP) networks, such as the Internet. This enables users to communicate via telephone over an Internet connection instead of a traditional analog connection.

Virtual Network Computing Created Oct 30, 2018 (22:31)

See VNC.

VM Created Sep 28, 2016 (22:28)

See Virtual Machine.

Voice over IP Created Oct 30, 2018 (22:31)

See VoIP.
