

system.db.exportCSV

This function is deprecated, use [system.dataset.exportCSV](#).

Description

Exports the contents of a dataset as a CSV file, prompting the user to save the file to disk. This function works exactly the same as [system.dataset.exportCSV](#).

Syntax

system.dataset.exportCSV(filename, showHeaders, dataset)

- Parameters

- String** filename - A suggested filename to save as.

- boolean** showHeaders - If true (1), the CSV file will include a header row.

- Dataset** dataset - The dataset to export.

- Returns

- String** - The path to the saved file, or None if the action was canceled by the user.

- Scope

- Client
