Key Performance Indicators Created Apr 27, 2017 (22:45)

A Key Performance Indicator (KPI) is a value or a small set of values that let you know how well your system is doing. The KPI will be different for every type of process or facility but generally show product creation speed, throughput, downtime, or anything else that may give an overview of the process.

KPI Created Oct 30, 2018 (20:25)
