Welcome

About this User Manual

This Welcome section provides a broad overview and information relating to modules, architectures, installation, and an Upgrade Guide. The sidebar on the left is a table of contents organized so you can navigate easily and quickly through Ignition's features, modules, functions, and so forth.

The Glossary defines common terms and acronyms found in Ignition and in the industry. Finally, in the Appendix, you'll find an exhaustive list of all the Components, Expressions, and Scripting Functions in Ignition.

Take a look at the navigation section on the left and poke around, or use the search bar at the top of the navigation.

Ignition 8.1

This User Manual is specifically for Ignition 8.1. Newer major versions of the software will have separate user manuals that focus on newer features.

Inductive University

Inductive University is a free online learning platform designed to help you master Ignition. You can watch hundreds of training videos and participate in our credential program to test your knowledge. It's the first step to joining our ranks of Certified Integrators.

This User Manual section is closely tied with Inductive University so you can have a conceptual understanding from this manual and a visual walk-through of the feature in the videos. Throughout this online manual, you will find links to the various Inductive University videos on the right side of the page. These videos correspond to the information in that page or section. This way, you can get a conceptual understanding from the information provided here, and a visual walk-through of the feature by watching the videos. The video links will look like the one to the right of this paragraph.
